Table of Content

Project Requirements

1. The management team requires a timeline mindmap for the new vehicle. It has the following phases -

a) Market Research

b) Planning

c) Design

d) Manufacturing

e) Sales

Note - The sub-categories are provided in the wireframe (Link)

2. Each segment in the mindmap should be able to perform two actions -

a) Hover - Upon hover, it should display a snippet of the content box with relevant details of the phase.

b) Click - Upon click, the box should maximize and stay on the screen unless closed

Acceptance Criteria

The segments that have a content box should have an icon to indicate so.	✓
The mindmap should be accessible on all devices and screen sizes.	✓
For touch screens, the hover feature should be disabled.	✓
The content inside the content box should support images, graphs, diagrams, and other media.	✓
Available features that are ready to use on the mind map should be provided in a document	✓
Parent segments should have the feature to collapse and expand the child segments	✓
